Softphone Training Objectives

After attending this training, users should have a basic understanding of:

- Application overview, signing in, and desktop layout
- Setting presence status, signing out, and accessing help
- Softphone functions including call management and voicemail list
- Configuring settings
- Utilizing Queues

Softphone Application Overview

Overview

Fuze Desktop and Web softphone offers the ability to place and receive phone calls from anywhere there is an internet connection.

Signing into Fuze Desktop and Fuze Web

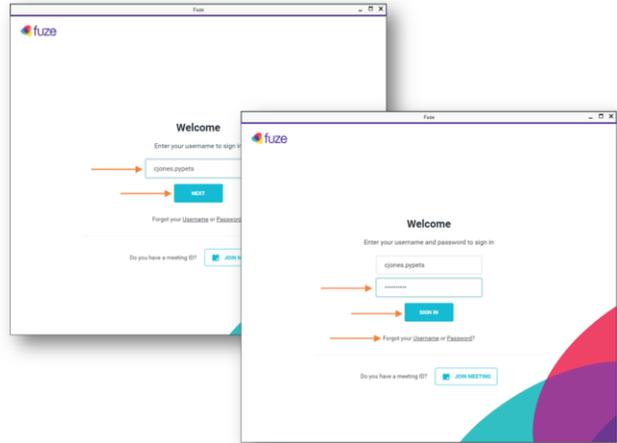

- Launch the Fuze application

OR

- Browse to web.fuze.com
- Enter username and then click the **NEXT** button
- Enter password and then click the **SIGN IN** button

If username or password have been forgotten, use the provided links.

New users will receive a **Get Started** message upon signing into Desktop. A **Setup Checklist** will appear in Fuze Desktop allowing the user to make a test call, choose the preferred device for making calls, the ability to add a picture, connect Google or Office 365 accounts to import contacts and calendars, and the option of setting up voicemail.

In Fuze Web, the **Setup Checklist** will include options to choose a preferred device for making calls, adding a profile picture, and connecting a Google and/or Office 365 account to import contacts and calendars.

If the username has been forgotten, the work email address will be used for retrieval. If the password has been forgotten, a magic link will be sent to the users registered email address, in order to reset it.

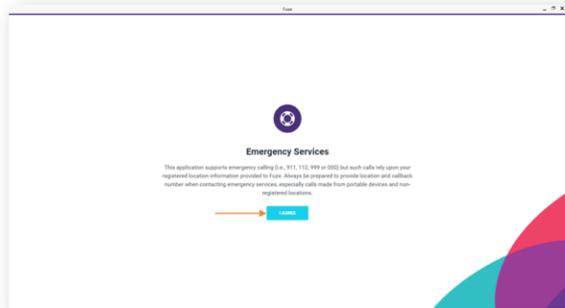

Understanding Emergency Services

Emergency Services are supported, however, it is important to understand what each user's registered location is, as that is where emergency personnel will be dispatched to unless otherwise directed.

- Click the **I AGREE** button to acknowledge

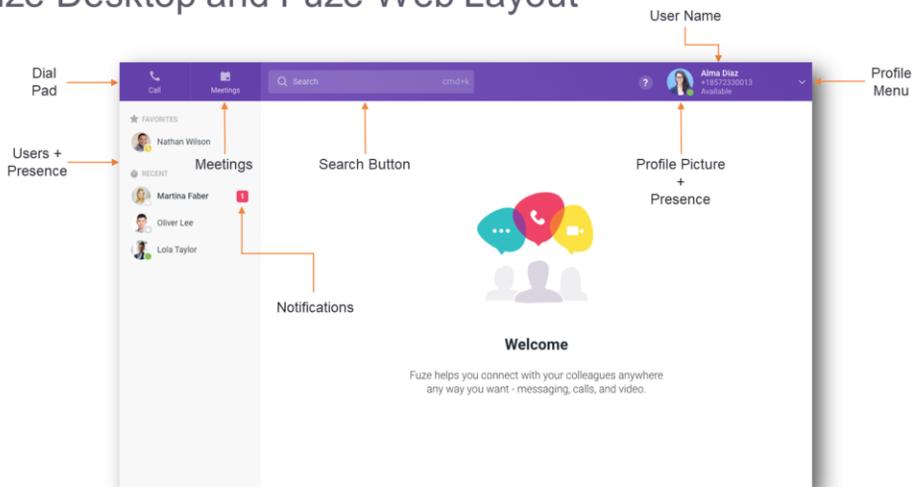

Any questions regarding the user's registered location details should be directed to the local Fuze Administrator.

Click the **I AGREE** button to acknowledge the **Emergency Services** notice. Any questions regarding the user's registered location details should be directed to the local Fuze Administrator.

Fuze Desktop and Fuze Web Layout

Fuze Desktop offers the ability to re-size the screen and make it smaller by clicking on the Restore button in the upper-right of the screen. Once made smaller, a user may drag and move Fuze Desktop anywhere on the screen. Fuze Desktop will automatically collapse the sidebar to showcase more of the content on the screen.

Softphone Training Objectives

After attending this training, users should have a basic understanding of:

- Application overview, signing in, and desktop layout
- Setting presence status, signing out, and accessing help
- Softphone functions including call management and voicemail list
- Configuring settings
- Utilizing Queues

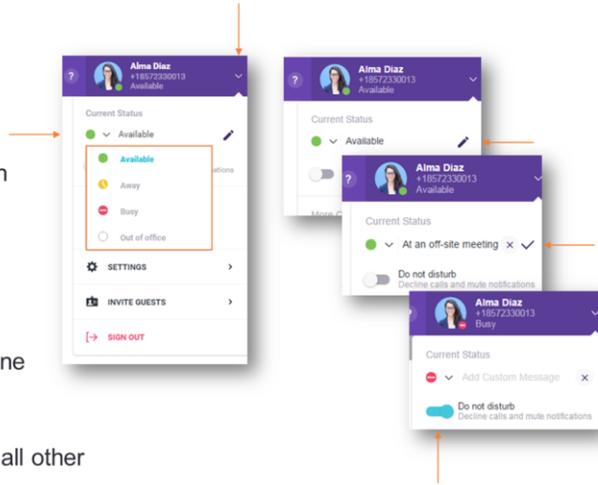

Setting Presence Status

Status describes current availability.

- Click the profile dropdown menu and then click the **Current Status** dropdown
- Select the applicable status option
- Optionally, click the ✎ icon, enter custom message details, and then click the ✓ icon
- Click the **Do not disturb** toggle to decline incoming calls and mute notifications

Manually setting presence will override all other presence options.

When on a phone call, the status indicator will change to **Busy** with a message of **On a call**. When in a Fuze Meeting, the status will change to **In a Meeting**. When the toggle is turned on for a Google or Office 365 calendar event, the status will be set to **Busy**. After 20 minutes of inactivity, Fuze Desktop will automatically change the status from **Available** to **Away**.

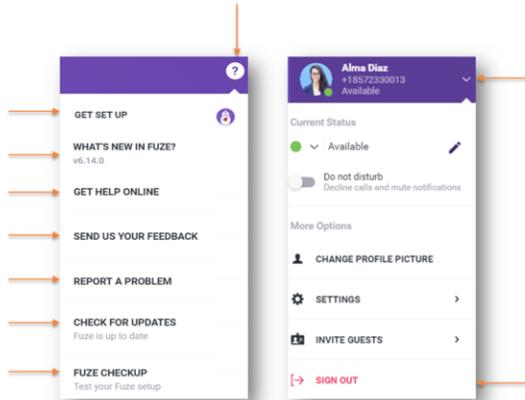

Accessing Help and Signing Out

The help feature allows a user to interact with Fuze or view application information.

- Click the  icon
 - **GET SET UP**
 - **WHAT'S NEW IN FUZE?**
 - **GET HELP ONLINE**
 - **SEND US YOUR FEEDBACK**
 - **REPORT A PROBLEM**
 - **CHECK FOR UPDATES**
 - **FUZE CHECKUP**

Signing out will set the user's status to offline.

- Click the profile dropdown menu
- Select **SIGN OUT**

9

Copyright 2021, Fuze

GET SET UP - allows the user to make a test call, choose which device will be used to initiate calls from Fuze Desktop, add a picture, set-up voicemail, or connect accounts

WHAT'S NEW IN FUZE? - provides a list of new features or bug fixes

GET HELP ONLINE - directs a user to the Fuze Help Center page (<https://help.fuze.com>) for the most recent product resources

SEND US YOUR FEEDBACK - allows a user to submit feature suggestions for upcoming releases

REPORT A PROBLEM - allows a user to report a Fuze Desktop problem

CHECK FOR UPDATES - allows a user to upgrade to the latest version of Fuze Desktop

DOWNLOAD FUZE DESKTOP (Fuze Web Only) – directs a user to <https://www.fuze.com/download>, where there is the ability to download the desktop application for Windows or Mac

FUZE CHECKUP – confirms a users account and network conditions will reliably support placing calls and participating in meetings

Softphone Training Objectives

After attending this training, users should have a basic understanding of:

- Application overview, signing in, and desktop layout
- Setting presence status, signing out, and accessing help
- Softphone functions including call management and voicemail list
- Configuring settings
- Utilizing Queues

Placing a Call

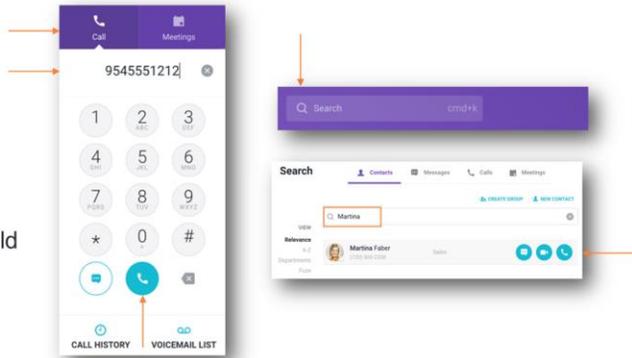

- Click the  icon
- Enter the number to call
- Click the  button to initiate call

OR

- Click the **Search** button
- Enter a contact name in the search field
- Hover over the contact and then click the  icon

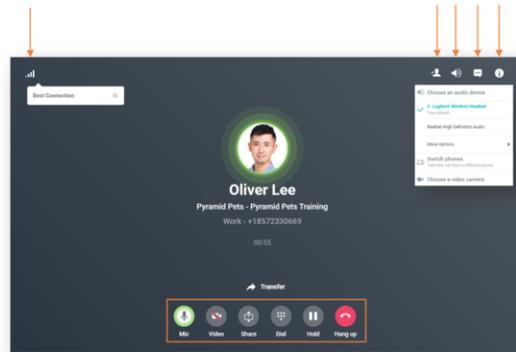

A preceding digit or country code is not needed prior to entering the phone number if the call is placed to a non-international number.

A search may also be performed by phone number or extension.

Managing an Active Call

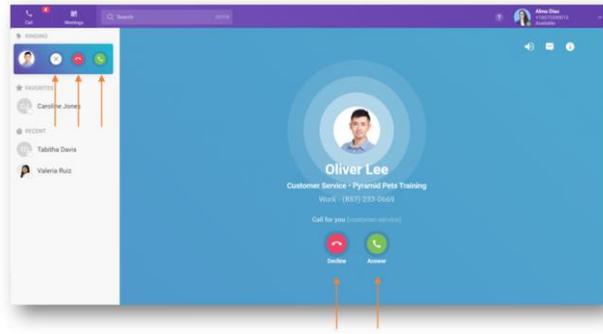

- Hover over the  icon to view information about the call connection
- Click the  dropdown window to **Add To Call**
- Click the  dropdown menu to **Choose an audio device**
- Click the  icon to send a message
- Click the  icon to view contact insights
- While on a call, the following options are available:

The ability to share screen or video is only available when in an active call with another Fuze Desktop user. If a call needs to be placed from a shared line, click the profile menu and choose the phone number the call needs to be placed from. A green indicator will highlight the current speaker in both the Fuze call screen, and the mini controller.

Receiving Calls While Active

- Click either the  or  icon to answer an incoming call
- Click either the  or  icon to reject a call or the  icon to ignore

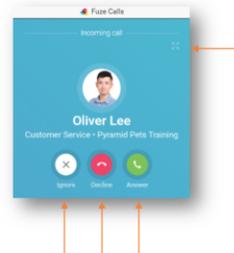

Fuze Desktop becomes active once a user clicks within the application and becomes inactive when a user clicks outside the application window. There is also the ability to answer an incoming call with a headset. Fuze currently supports approved Logitech, Plantronics, and Jabra headsets for use with Fuze Desktop (a list of Fuze-supported headsets can be found at <https://help.fuze.com>).

Receiving Calls While Inactive

While outside of Fuze Desktop, a comms control window will appear.

- Click the  icon to answer a call
- Click the  icon to reject a call
- Click the  icon to ignore a call
- Click the  icon to expand the incoming call screen

The floating comms control window can be moved to a preferred location on the screen.

Within Fuze Web, a pop-up notification appears on the right-hand side of the screen with the option to answer the call.

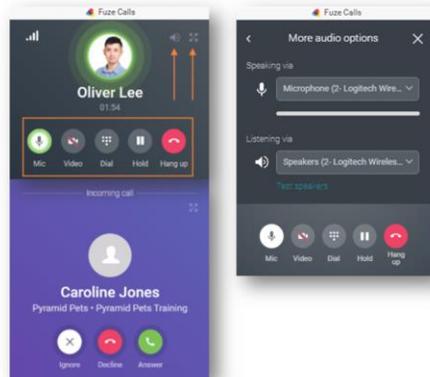

Controlling Calls While Multitasking

User has full call control when outside of Fuze Desktop or when chatting in Fuze Desktop.

- Click the  icon to expand the active call screen and bring Fuze Desktop to the forefront
- Click the  icon to view **More audio options** for the call

Incoming calls while on an active call will appear below the comms control; answering the call will place the initial caller on hold.

Clicking outside of Fuze Desktop will bring the comms control window back on the screen. The comms control window can hold up to five voice calls and one meeting (Fuze Desktop Only).

To record an active call, click the **Dial Pad** and then click *3. Enter *7 to pause or resume recording of a call. Recording capabilities will need to be configured by a local Fuze administrator.

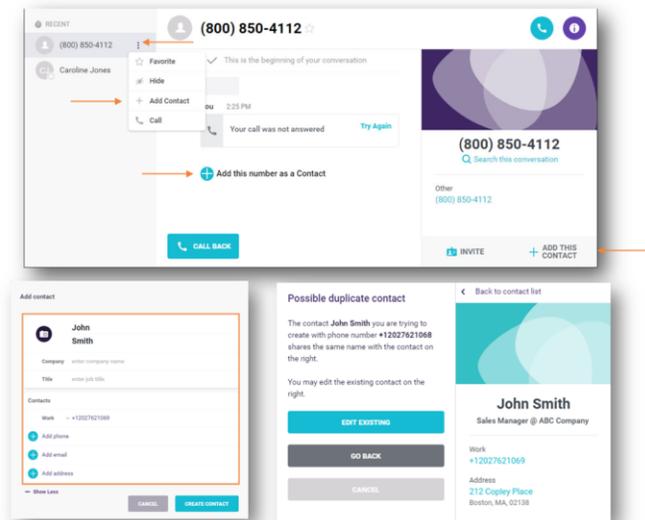

Adding a New Contact

To add a contact to the user's individual address book:

- Click the  and select 
- OR**
- Click the  icon or the  button
- Fill in all applicable fields and then click the  button

Fuze will notify you of any potential duplicate contact records.

Fuze informs a user of duplicate names or phone numbers. Added contacts will be synced to Fuze Mobile. A profile image can be added to the new contact by clicking the camera icon to the left of the name fields.

There is the ability to edit and delete contacts, once the contact has been created.

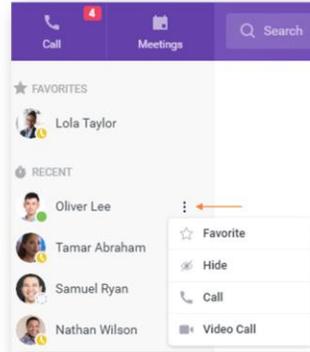

Managing the People List

A user will have the ability to manage contacts and unknown phone numbers listed on the people list.

- Click the ellipsis in the recent people list to move a contact to the **Favorite** list, **Hide** the contact from the recent people list, **Call** the contact, or create a **Video Call** with the contact

To unhide a contact, search for and click the contact's name.

Initiating Video During an Active Call

Video will be available to share while on a call with an internal contact. To share video:

- Click the  icon
- Click the  icon again to stop sharing video

A preview of the shared video will appear in the top right corner of the screen; click the arrow icon to minimize this window.

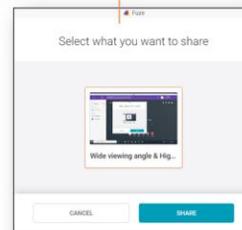

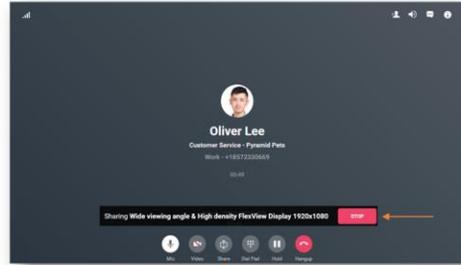

Sharing video will only be available when on an active call with another Fuze Desktop user. During video sharing, a **More** button will appear with the option to **Transfer**, **Merge**, or utilize the **Dial pad**.

Sharing a Screen During an Active Call

- Click the  icon to share a screen during an active call with a colleague
- Select the screen to share and then click 
- Click the  button on the active call screen to stop sharing the current screen

You can also click the  button from the mini controller to stop sharing the current screen.

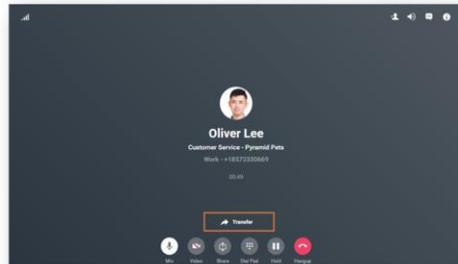

Screen sharing will only be available when on an active call with another Fuze Desktop user. During screen sharing, a **More** button will appear with the option to **Transfer, Merge**, or utilize the **Dial pad**.

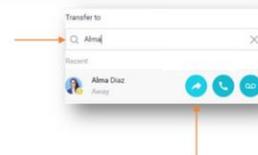

Performing a Transfer Now

Transfer Now allows a call to be transferred without speaking to the recipient first.

- Click the  **Transfer** icon to transfer a call unattended
- Type the name, extension, or number in the search field
- Hover over the contact and then click the  icon to **Transfer now**

To transfer to a number not in the directory, enter the number in the search field and then click the  icon.

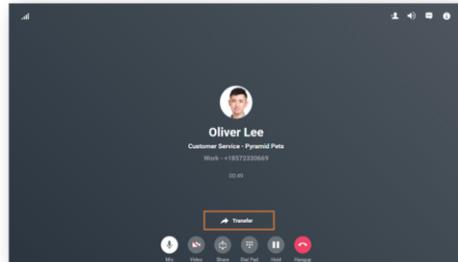

With a **Transfer Now**, the recipient of the call will see the original caller's ID.

A pop-up will appear in the upper-right portion of the screen, informing the user of transfer status.

Performing a Call First Transfer

To transfer a call and speak to the recipient first:

- Click the  Transfer icon
- Type the name, extension, or number in the search field
- Hover over the contact and then click the  icon to **Call first**

When transferring to a "Fuze Room" or a Fuze meeting, the call may be transferred utilizing the **Transfer Now** option or the **Call First Transfer**. If utilizing a **Transfer Now**, the user will enter the dial in number, and then select the transfer button (meeting ID number would be required). A **Call First Transfer** allows the user to enter the meeting ID number, then press transfer and the call will transfer directly into the meeting as a dialed in participant.

A call may also be transferred to a Conference Room. If utilizing a **Transfer Now**, the user will enter the conference bridge number, then transfer the call. The caller would then be prompted to enter the conference room number and the access code to enter. In a **Call First Transfer**, the user is allowed to enter the conference room number and the access code for the caller, press **Transfer** again and the call will be sent into the conference room.

A pop-up will appear in the upper-right portion of the screen, informing the user of transfer status.

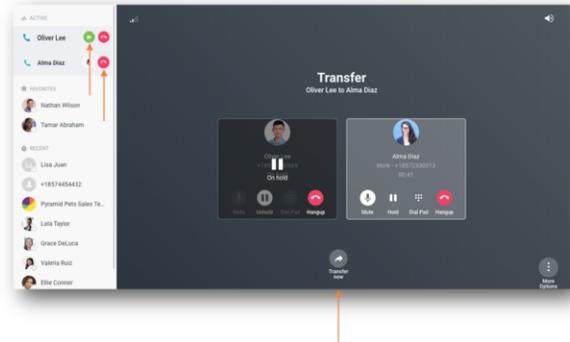

Completing a Call First Transfer

To complete the transfer:

- Click the  button after speaking with the receiving party

To cancel the transfer, click the  icon next to the receiving party's name and then click the  icon to resume the original call

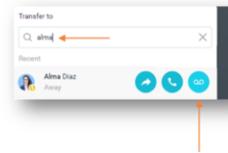

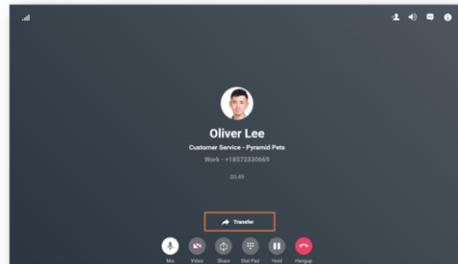

Transfer Now will transfer the caller immediately to the receiving party.
More options will provide the ability to view contact insights or chat with the user currently on the active call.

Transferring Directly to Voicemail

To transfer a call directly to the voicemail of a colleague:

- Click the  Transfer icon
- Type the name, extension, or number in the search field
- Hover over the contact and then click the icon  to **Send to voicemail**

Send to voicemail will only appear for internal contacts. A pop-up will appear in the upper-right portion of the screen, informing the user of transfer status.

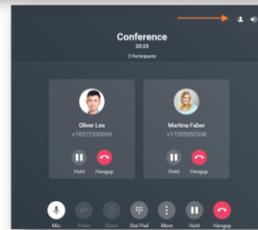

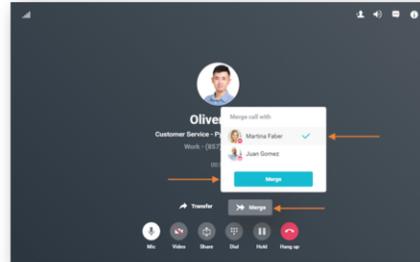

Merging Calls

Merging calls allows an active caller and a caller on hold to be merged.

- Click the  Merge icon
- Click on the name or number that is currently on hold
- Click the  MERGE button
- Click the  button to add a person to the call

A total of two additional participants can be added to a merged call.

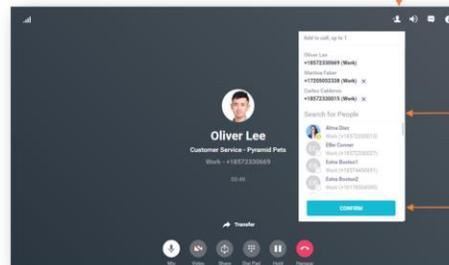

Creating an Audio Conference

An audio conference call allows multiple participants to be joined on a single call.

- Click the  icon while on an active call
- Enter the name or phone number for additional participants to be invited
- Click on the name or number and then click the  button

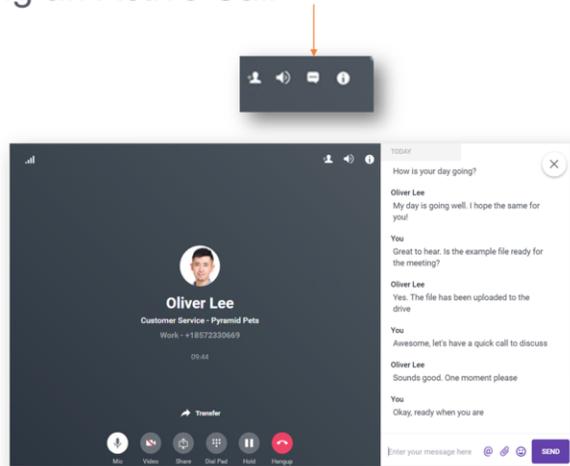

A maximum of five participants are allowed in an audio conference.

Messaging a Contact During an Active Call

To message a caller during an active call:

- Click the  icon
 - The message panel will open
- Enter text in the message field and click the  button, or press Enter to send

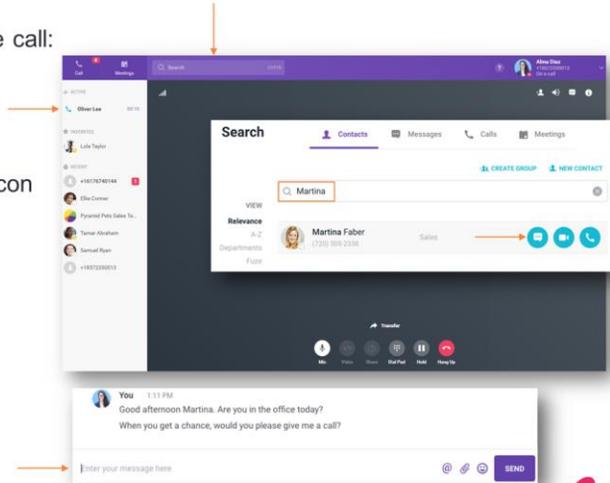

Messaging Another Contact During an Active Call

To message another user during an active call:

- Select the **Search** button
- Search for a user
- Hover over the user and click the  icon
- Enter text in the message field and click the **SEND** button, or press Enter to send

To return to the active call, click the caller's name within the **ACTIVE** list.

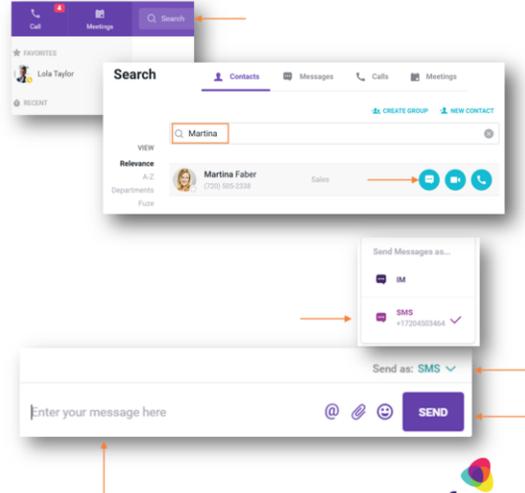

Sending a Short Message Service (SMS) – US & Canada Only

SMS allows messages to be sent to external phone numbers. To send an SMS:

- Click the **Search** button and then type a contact name or number in the search field
- Hover over a contact and then click the  icon
- Click the **Send as: IM** dropdown and then select **SMS**
- Enter text in the message field and then click the **SEND** button or press Enter to send

To manually send an SMS to any US number, click the  icon, enter the phone number, and then select the  icon.

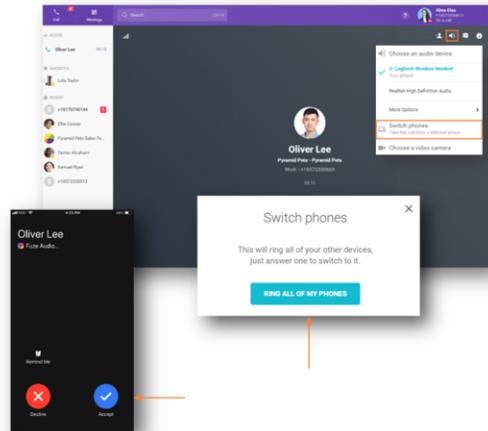

SMS is only available in North America (US and Canada) and requires an additional license. Multi-Media Messaging Service (MMS) is also available to all users with an SMS license.

Switching Devices During an Active Call

To switch an active call from one device to another:

- Click the  button
- Click **Switch phones**
- Click **RING ALL OF MY PHONES** to ring all Fuze-enabled phones
 - The caller will be placed on hold
- Answer the device on which to continue the call

When a user clicks **RING ALL OF MY PHONES**, the person on the other end will be on a silent hold until the user answers the paired device. If the call is not answered, then the person on the other end will hear the 20 second ring, until it is automatically routed to the voicemail.

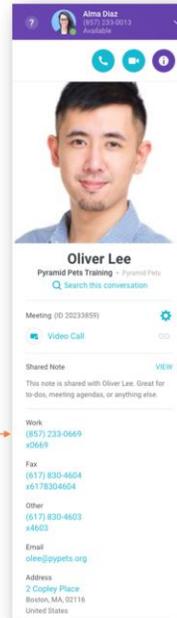

Viewing Contact Insights

The Contact Insights panel includes meeting controls and business details about the contact, which are pulled from the portal.

- Click the  icon to view/hide insights for a selected contact
- Click the telephone number to place a call to the selected contact

Scroll down to see contact information.

Contact information that may be seen includes: name, company, department, work address, work phone number, mobile number, and email address.

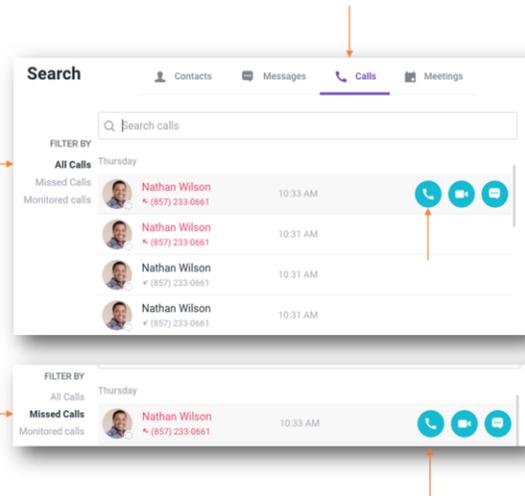

Accessing Call History

To view call history from the search field:

- Click the  button
- View a list of **All Calls** by default or click **Missed Calls**
- Hover over a contact and then click the handset  icon to call

The Call History can also be accessed from the  icon.

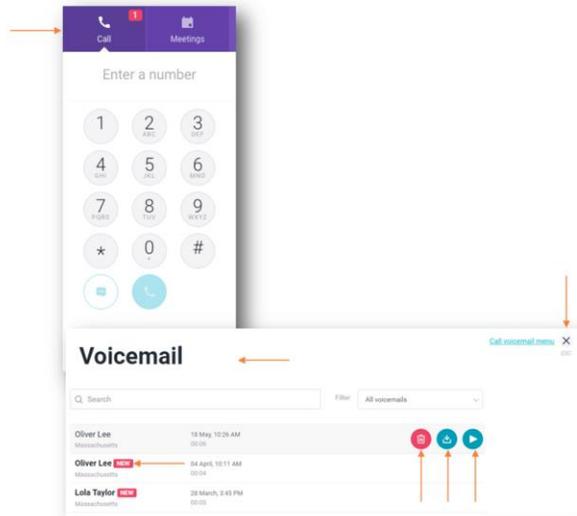

Viewing the Voicemail List

- Click the  icon
- Select **VOICEMAIL LIST**
- Hover over a voicemail
- Click the  button to permanently delete the voicemail
- Click the  button to download the voicemail as a .wav file
- Click the  button to play the voicemail
 - Voicemail will play within the application
- Click the  icon to close the page

New voicemails will show a **New** icon.

32

Copyright 2021, Fuze

A user may click the **Filter** dropdown to filter by **All voicemails** or **New voicemails**. There is the ability to search for a specific voicemail by clicking in the **Search** field and then typing the name of the chosen voicemail to view.

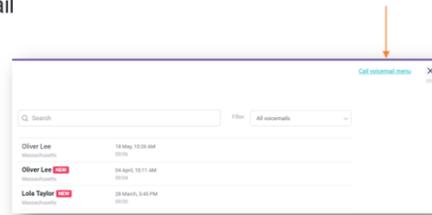

Accessing the Voicemail Menu

The Voicemail Menu is used to manage voicemail settings at any time.

- Click the [Call voicemail menu](#) link

Press 4 within the Voicemail Menu to set a temporary message.

Call voicemail menu takes a user directly into the voice message system, which allows changes to the greetings or access to additional voicemail features.

Initial voicemail configuration:

- Access the message center
- Enter temporary PIN when prompted (extension)
- Follow prompts to record name and standard greeting (busy message is not necessary)
- Create a new permanent PIN (new PIN must be 4-15 digits, cannot be the same as the extension number, a replicated digit (1111), or sequential digits (1234))

The Voicemail Setup Guide can be found in the Help Center:
<https://help.fuze.com/hc/en-us/articles/360010964173-Voicemail-Setup-Guide>

Softphone Training Objectives

After attending this training, users should have a basic understanding of:

- Application overview, signing in, and desktop layout
- Setting presence status, signing out, and accessing help
- Softphone functions including call management and voicemail list
- Configuring settings
- Utilizing Queues

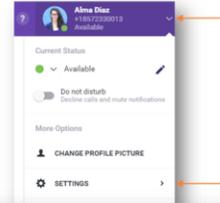

Using a Preferred Device

Call using the preferred device, known as click-to-call, allows a specific device to be used when placing a call.

- Click the profile dropdown menu
- Select **SETTINGS**
- Select **Calls**
- Click the  button by **My preferred phone** and then select a device

The default setting will use Fuze Desktop for all calls.

Place my calls using (this app) will be the default setting.

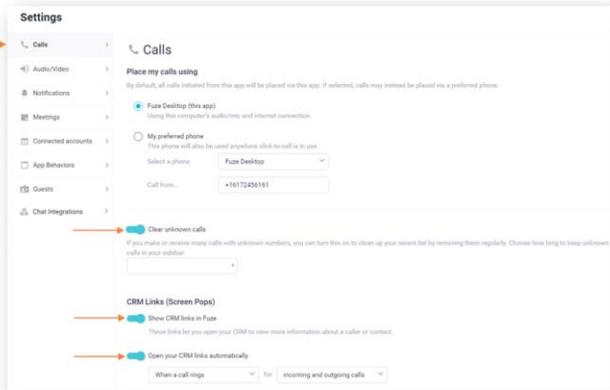

Clear unknown calls removes unknown numbers, allowing user to manage how long these numbers stay in the sidebar.

Clearing Unknown Calls and Managing CRM Settings

Clearing unknown calls allows a user to auto-remove unknown calls.

From the **Settings** options:

- Click **Calls**
- Click the  toggle by **Clear unknown calls** and then select a timeframe
- Click the  toggle to show **CRM Links** in Fuze
- Click the  toggle to **Open your CRM links automatically** and then make applicable selections

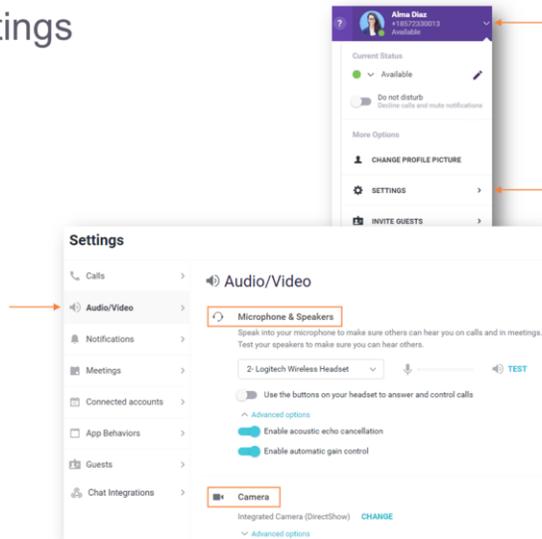

Must first be configured by Fuze.

Accessing Audio/Video Settings

- Click the profile dropdown menu
- Select **SETTINGS**
- Select **Audio/Video**
- Adjust settings for **Microphone**, **Speakers**, and **Camera**

Click the **TEST** button to hear an audio sample.

Use of **Advanced Options** is currently available on Fuze Desktop only.

Use the buttons on your headset to answer and control calls - gives Fuze permission to capture events from connected headsets (utilizes HID Integration). Some headsets have buttons which allows a user to answer the call, hang-up, and mute/unmute. When this feature is enabled, Fuze will capture the event and if the feature is disabled, Fuze will not capture those events to accept, hang-up, or mute a call

Acoustic echo cancellation - improves voice quality by preventing echo from being created or removing it after it is already present

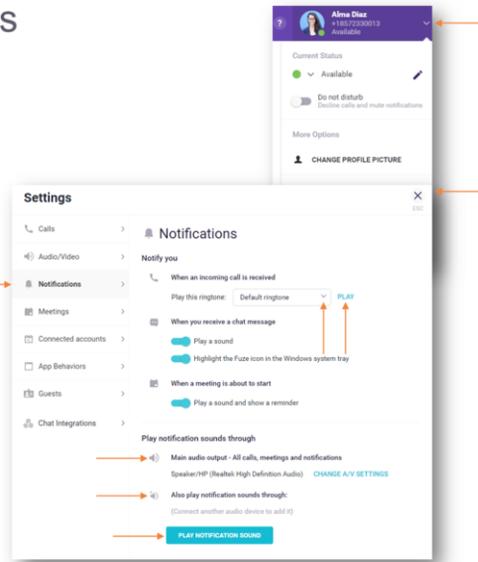

Automatic gain control - automatically adjusts the microphones sensitivity based on common heuristics, e.g., intelligently adapts the microphone sensitivity based on where participants are seated, making the conversations clearer for all participants

Configuring Notification Sounds

- Click the profile dropdown menu
- Select **SETTINGS**
- Select **Notifications**
- Click the **Play this ringtone** dropdown to select the ringtone to play when a call is received
- Click the **PLAY** button to hear an audio sample of the selected ringtone
- Click the **PLAY NOTIFICATION SOUND** button to test the audio output

Users can change **Main audio output** and additional notification output by clicking the corresponding buttons.

Users may click the **CHANGE A/V SETTINGS** button to be taken back to the **Audio/Video** configuration page.

Highlight the Fuze Icon in the Windows system tray or **Bounce the Fuze icon in the MacOS dock** is a Fuze Desktop Only feature.

Importing Contacts

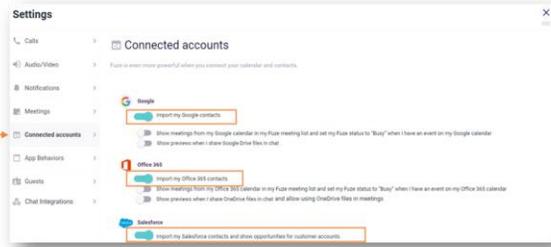

Contacts can be added by connecting additional accounts with Fuze Desktop to import personal contacts and contacts within a corporate directory.

From the **Settings** options:

- Click **Connected accounts**
- Click the toggle for , , or  to import contacts from these accounts

Accounts and associated contacts will be displayed under **Search > Contacts**.

When connecting to a Google or Office 365 account, a user will also be able to access an organization's full directory (Active Directory or Azure Active Directory) when searching within Fuze Desktop.

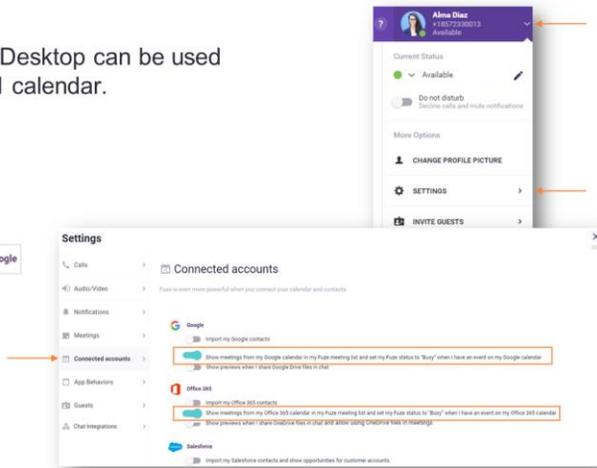

Connecting to an External Calendar

Connecting additional accounts in Fuze Desktop can be used to sync the user's status with an external calendar.

- Click the profile dropdown menu
- Select **SETTINGS** and then click **Connected accounts**
- Click the  toggle to sync to  and  calendar events

Status will be set to **Busy** when there is an event on the user's calendar.

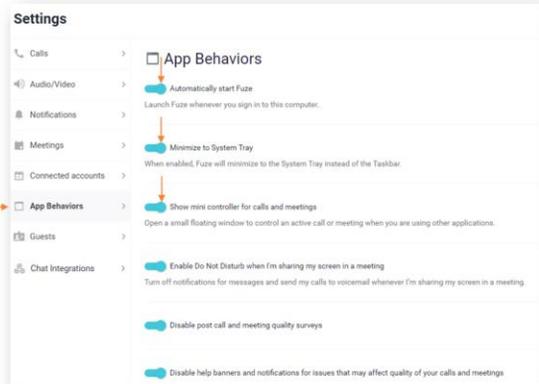

Enabling Auto-start and Minimizing Fuze Desktop

Auto-start allows Fuze Desktop to automatically open upon logging into a computer.

From the **Settings** options:

- Click **App Behaviors**
- Click the toggle next to **Automatically start Fuze**
- Click the toggle to enable the **Minimize to System Tray** option to minimize Fuze Desktop to the Windows System Tray
- Click the toggle next to **Show mini controller for calls and meetings**

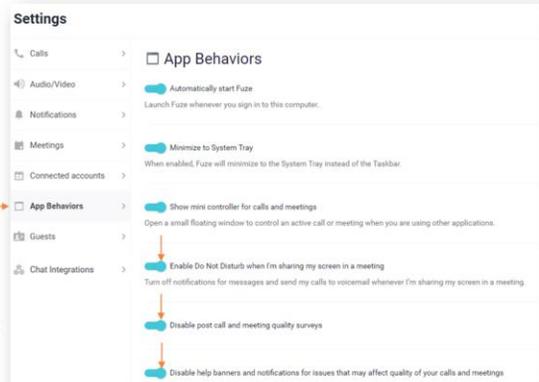

Automatically start Fuze and **Minimize to System Tray** (Windows only) are Fuze Desktop Only

Show mini controller for calls and meetings (Fuze Desktop Only) – opens a small floating window to control an active call or meeting when using other applications

Enabling Do Not Disturb and Help Banners

From the **Settings** options:

- Click **App Behaviors**
- Click the toggle to **Enable Do Not Disturb** when sharing a screen in a meeting
- Click the toggle to **Disable post call and meeting quality surveys**
- Click the toggle to **Disable help banners and notifications** for issues that may affect quality of your calls and meetings

Enable Do Not Disturb when I'm sharing my screen in a meeting (Fuze Desktop Only) – turns off notifications for messages and sends calls to voicemail when user is sharing screen in a meeting

Disable post call and meeting quality surveys – turns off the quality surveys that appear when a call or meeting completes

Disable help banners and notifications for issues that may affect quality of your calls and meetings – turns off any help banners or troubleshooting notifications that may appear during a call or meeting

Softphone Training Objectives

After attending this training, users should have a basic understanding of:

- Application overview, signing in, and desktop layout
- Setting presence status, signing out, and accessing help
- Softphone functions including call management and voicemail list
- Configuring settings
- Utilizing Queues

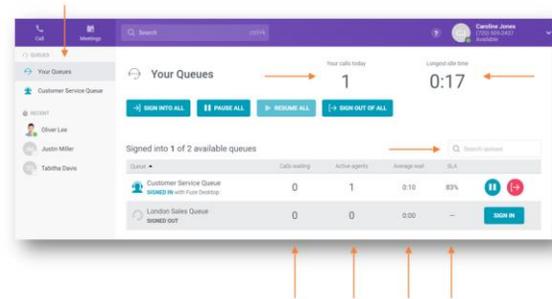

Viewing Information in the Queue as an Agent

The **Your Queues** view will display available information about queue calls, including:

- The number of **Your calls today**
- The **Longest idle time** since the last connected call
- The number of **Calls waiting** to be answered
- The number of **Active agents** signed into the queue
- The **Average wait** time for a call in the queue
- Service Level (**SLA**) percentage

Agents have the ability to search for queues from within their queue views.

44

Copyright 2021, Fuze

Average wait – the average time taken for agents to answer a call or the time a customer waits in the queue before being answered

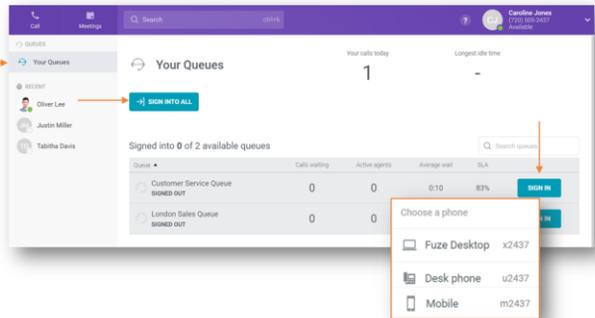

SLA – the threshold set by an organization that specifies the target time (in seconds) that an agent has to answer a queue call

Agents can hover over the **SLA** percentage to view the target time.

Signing into Queues as an Agent

From the Fuze Desktop home page:

- Click the **Your Queues** icon
- The queues window will open
- Click the **SIGN INTO ALL** button or click the **SIGN IN** button for the individual queue to join
- Select the preferred device from the dropdown menu

Pausing Queues as an Agent

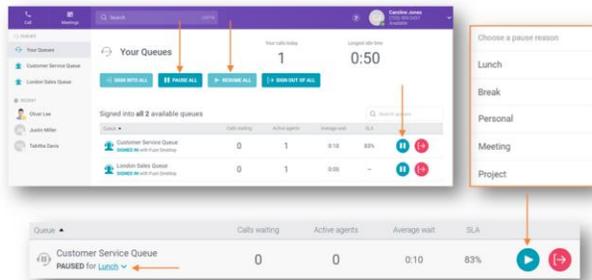

When pausing a queue, a user will not receive a call from that queue.

From the **Your Queues** view:

- Click the **PAUSE ALL** button or click the **⏸** icon for the individual queue
- Select the appropriate pause reason
- Click the **RESUME ALL** button or the **▶** icon to un-pause and resume receiving calls in the queue

Agents can change their pause reason without needing to un-pause themselves.

When using the **PAUSE ALL** button, the pause reasons pop-up box will appear. An agent can pause while on an active queue call, the call will be uninterrupted, and the agent will be paused after that current queue call.

Signing Out of Queues as an Agent

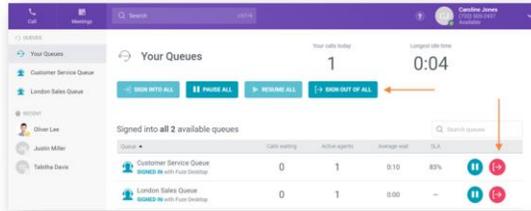

From the **Your Queues** view:

- Click the **SIGN OUT OF ALL** button or click the **⏸** icon for the individual queue

Queue information will be displayed even when signed out.

Queue	Calls waiting	Active agents	Average wait	SLA	
Customer Service Queue Signed out	0	1	0:10	83%	SIGN IN

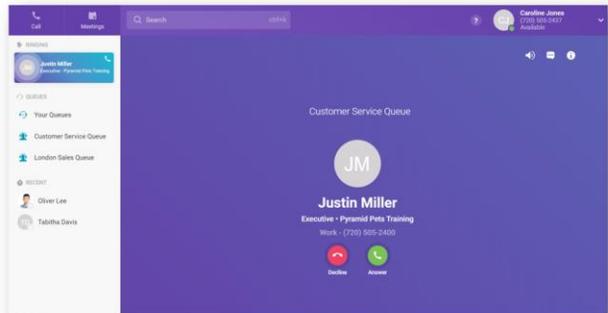

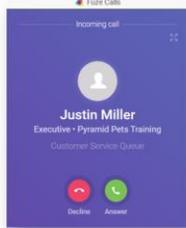

When signing out of a queue from the left-side panel, only the selected queue will be signed out. When an agent logs out of a queue, the agent's calls are no longer shown in Queue reports within Fuze Data. When an agent is paused in a queue, this information will display in Queue reports within Fuze Data.

Answering a Queue Call as an Agent

Queue calls will be presented with caller ID and name of queue.

The floating comms control window can be moved to a preferred location on the screen.

Softphone Training Objectives

After attending this training, users should have a basic understanding of:

- Application overview, signing in, and desktop layout
- Setting presence status, signing out, and accessing help
- Softphone functions including call management and voicemail list
- Configuring settings
- Utilizing Queues

Softphone Knowledge Check

1. Call history will not be updated when placing or receiving a call. True or False? **False**
2. When receiving a call while Fuze Desktop is inactive, a call comms window will appear. True or False? **True**
3. Signing out will set the user's status to "Out of office". True or False? **False**
4. Which icon is used to transfer an active call? 
5. To add a contact, a user can click the ellipsis in the People list and select the  button. True or False? **True**
6. It is possible to share a desktop screen while on a call with a colleague. True or False? **True**
7. Notification sounds for incoming calls cannot be muted. True or False? **False**
8. Performing a Transfer Now allows a user to speak with the recipient of the transfer prior to transferring the call. True or False? **False**

Thank You!
